

- Adding feature
- Fixing the bug
- Improve the design
- Optimise Resource Usage

Tests you write after the code are “defence”

Tests you write first(ahead of code) are offence

You are not allowed to write any production code until you have written first failing unit test

You are not allowed to write more of unit test than is sufficient to fail - and not compiling is failing

You are not allowed to write more production code that is sufficient to pass the currently failing unit test

Test Code - Compiler Error

Test Fail

Test Pass
